

Please consider the economic and educational impact the 585 area code change will have on this already disadvantaged area. We are an integral part of the WNY economy, not Rochester. Since lack of transportation is such an issue here, we must depend on accessing local merchants and information. Parents having to place a long distance call to their child's school, and between one school to another in the same district is just plain not a good way of doing business. Thank you for your consideration in this matter.
